shock waves

pressure
concussion

AS Break
pressure on the ears
is painfully unbearable

There is a brilliant white flash and a terrific shockwave that spreads out at ground level. Not perceiving anything like a typical explosion, however. It's like an explosion, only it's not.

AOL/S

reminds me of Tunguska Incident

UNSURE
APPREHENSIVE

HAPPY
RELAXED
CONFUSED!

4½ - as if a relief from pressure / the strain of uncertainty
However these people seem rather "confused" over the results,
As if the event was not a total failure, but something unexpected,
unusual, or confusing results.

Whatever creates the pressure shockwave (I'm not sure whether it is a solid mass or mass of energy) ~~does~~ causes the effect at, or just above ground level. The shockwave radiates out at 360° from the ground zero. The pressure change is incredible, causing sorepain to inner ear.

POST SESSION

7 MAY 81

1430hrs

Received impression that ^{something} originating at the bunker was bounced off satellite to target. But still feel that the object itself follows the path of an arc. I also have the feeling that the object leaves the atmosphere and then reenters it somewhere along the arc.
